Black Edition 80kg	14299106	74mm	46mm	10mm	5mm	20kg	2	AISI302 s/s dark	POM/Black

The Cooltools Easy Installer is an adjustable vibration damper developed in close cooperation with Norwegian heat pump installers. Utilising patented alloys of galvanised metal combined with high quality and UV resistant end caps, this product is not only suitable for outdoor use, but will outlast most new heat pumps when installed together.

Its patented adjustment system provides flexibility and ease of use, whilst ensuring that vibrations and noise from the heat pump are kept at a minimum.
